Welcome to USA College Day 2026

Dear Students,

On behalf of the United States Mission to the United Kingdom, welcome to USA College Day 2026!

Studying and living abroad can be a life-changing experience. Having moved to the UK last year to serve as President Trump's Ambassador to the United Kingdom, I can certainly say I've learned a lot about the UK ... even though I have visited this country many times over the years.

There is no other partnership quite like the U.S.-UK relationship. Formal student exchanges have taken place between our countries for over a century, contributing to the deep and formative ties that exist between our citizens, businesses, and universities today. With the United States marking a historic milestone this year - 250 years since the signing of the Declaration of Independence - it's a great time to experience the storied exchange between our nations for yourself.

Studying in the United States offers a chance to experience some of the world's most respected higher education institutions. From vibrant campus communities to dynamic city schools, you can expect the very best of American culture and academic thought, built on a belief in free and open inquiry that has helped propel our country forward for 250 years. Many of those founding beliefs were shaped here, in the United Kingdom.

This year's USA College Day will give you a taste of those academic experiences and traditions through the chance to meet representatives from more than 100 universities in all parts of the United States. These representatives are here to help guide your academic journey, so you can go as far and as high as your ambitions and abilities will take you.

I gained so much from my time at university - connections, friends, ideas - and I hope you benefit from those same experiences. Thank you for your interest in studying in the United States, and I wish you the best of luck as you take these next steps in your educational journey.

Sincerely,

A handwritten signature in black ink that reads "Warren A. Stephens".

Warren A. Stephens

About the US-UK Fulbright Commission

From 17-year-olds to septuagenarians, we support education exchange between talented people of all backgrounds between the UK and the USA, enabling study, teaching and research at some of the world's most exciting universities through scholarships, advice, coaching and experiential learning.

EducationUSA

The EducationUSA centre at the US-UK Fulbright Commission is the UK's official source of information on US higher education and is part of the global EducationUSA network, comprising over 400 US educational advising centres worldwide. Our team of educational advisers provides accurate, unbiased information about all accredited US higher education institutions and offers a wide range of free resources, events and services for students, parents and advisers, reaching over one million students, parents and advisers annually.

In partnership with the Sutton Trust, the US-UK Fulbright Commission also runs the Sutton Trust Fulbright US Programme, which provides academically-talented British students from low- and moderate-income homes the opportunity to explore US study. It includes a number of UK residentials and a week-long trip to the United States to visit a variety of universities.

US-UK Fulbright Awards Programme

The global Fulbright Programme is one of the most prestigious awards programmes worldwide, operating in over 150 countries, with over 300,000 alumni.

The US-UK Fulbright Awards Programme offers a wide range of scholarships to support postgraduate study, research and teaching. Since the Commission was founded by diplomatic treaty in 1948, it has enabled more than 23,000 British and American citizens to study, research and teach at universities on either side of the Atlantic, advancing knowledge, promoting civic engagement and developing compassionate leaders. In the 21st century, Fulbrighters work to address major global challenges, from energy sustainability and economic development to public health and food security.

Be sure to visit the Fulbright stands in the Advising Zone to find out more about the services and support that Fulbright can offer you.

Why study in the USA?

More than 10,000 students from the UK study in the United States every year. Find out why so many students choose the US for their studies.

Quality, variety and reputation of US universities

Although university rankings should be taken with a grain of salt, US institutions consistently rank in the top ten universities in the Times Higher Education World University Rankings.

With over 4,000 institutions offering undergraduate degrees, students can also choose from a large and diverse pool of universities, compared to 120 universities in the UK. From such variety of universities, there's bound to be one that's a great fit for you.

Liberal arts curriculum and focus on teaching

You don't have to know what you want to study when you start your degree. The liberal arts curriculum at US universities is a real selling point for students who don't want to narrow their study options at the age of 18.

A liberal arts education allows students to become well-rounded and provides them with flexibility in exploring their academic interests before specialising in a major, or even a double major. If you have a passion for something and it is not offered, you might even be able to create your own curriculum and degree.

Campus life and extracurricular activities

Whereas UK universities focus on independent learning and particularly on academics, on a US campus, your learning and development is encouraged outside of the classroom/library too.

American universities aim to educate the whole student by providing opportunities for extracurricular involvement, community service, internships, sport, leadership and the arts. If there isn't a club you're interested in, you can create your own.

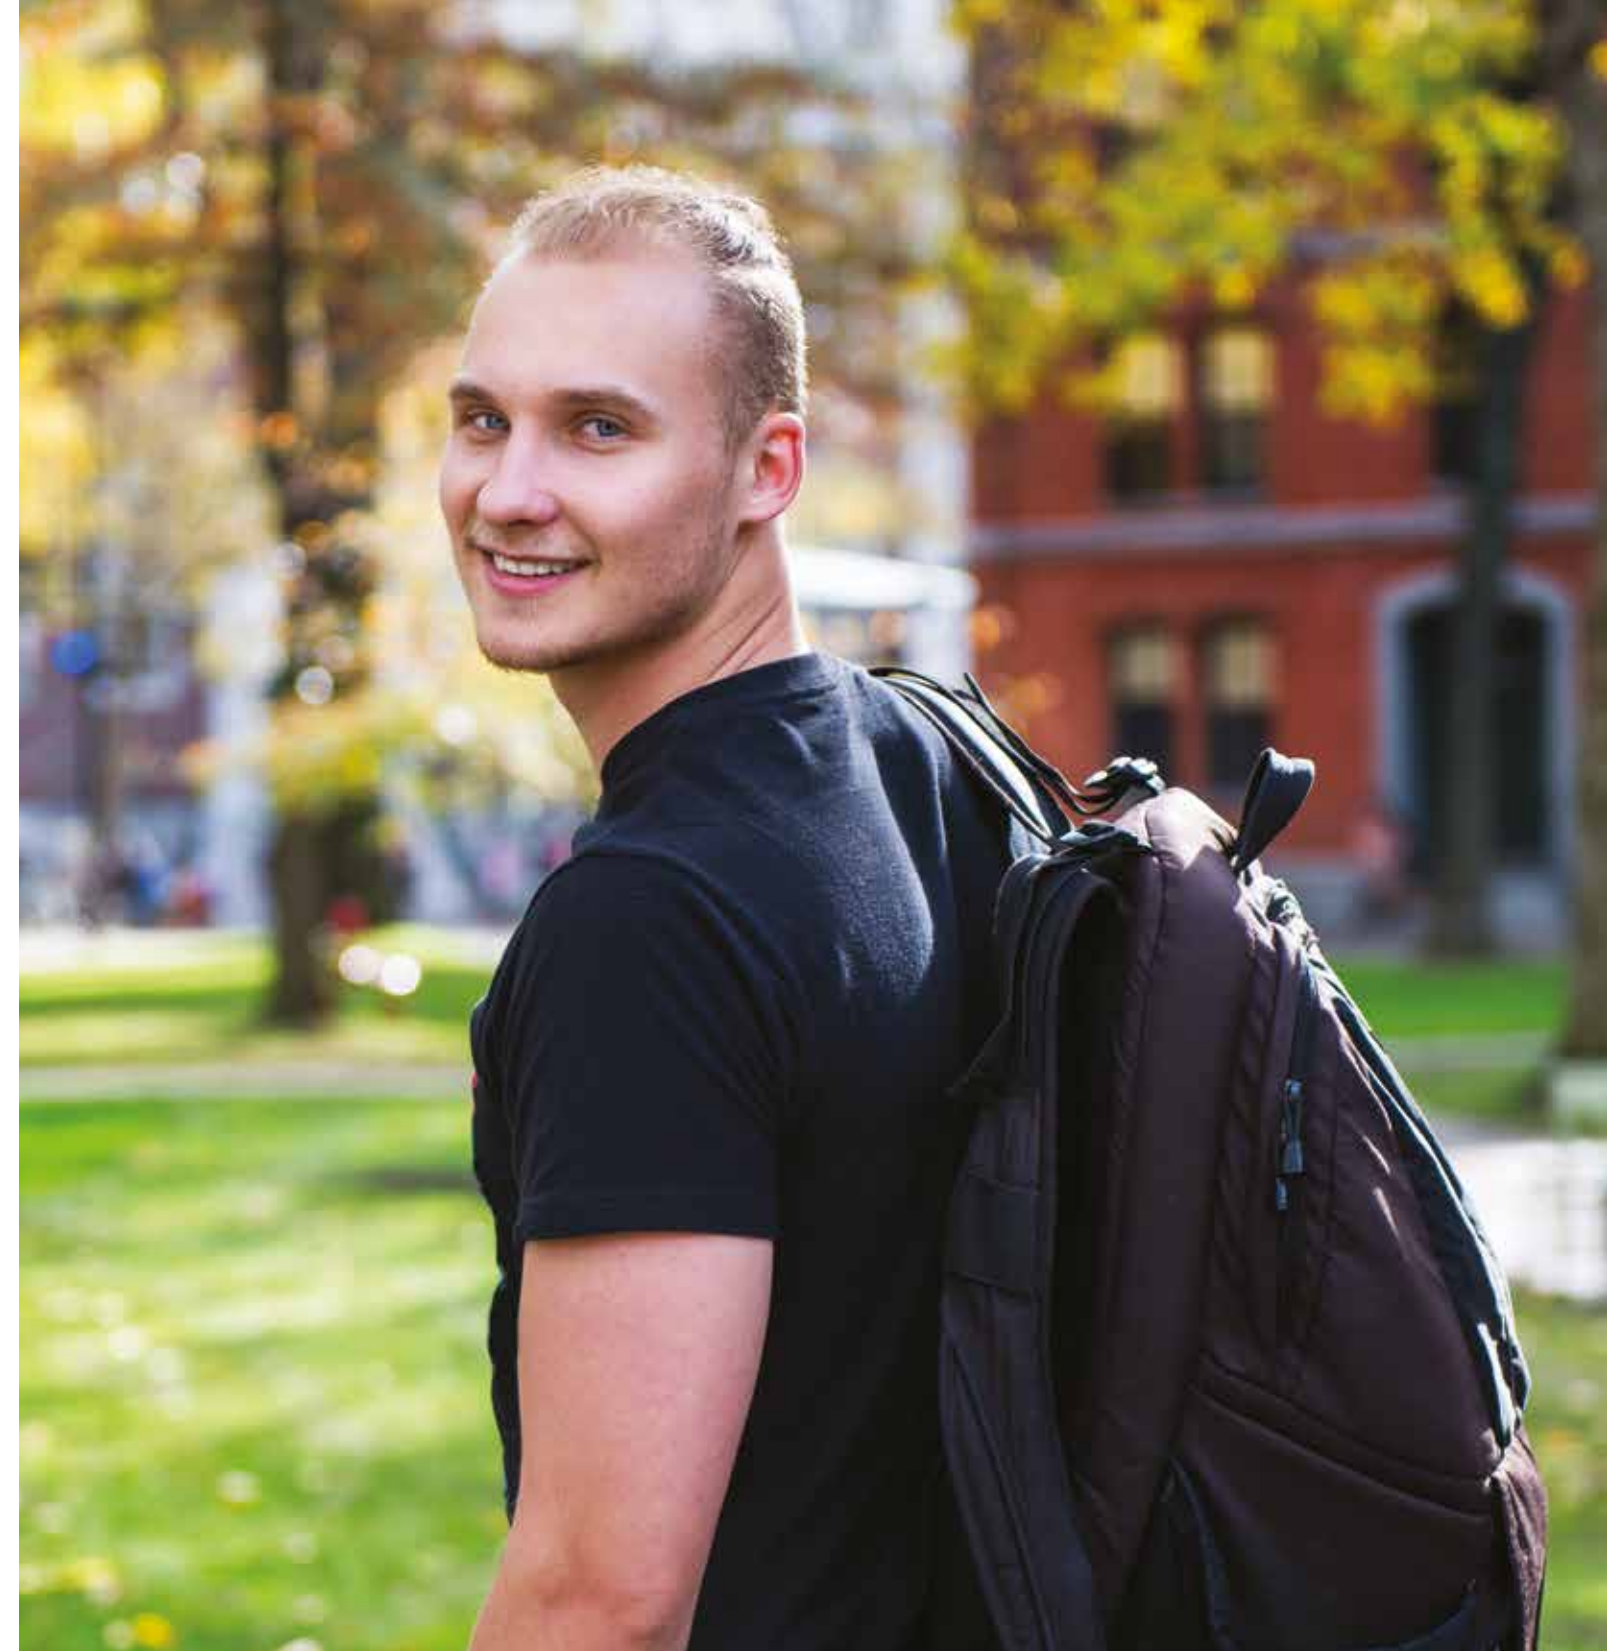

Funding opportunities

The availability of funding is a big draw for international students. Undergraduate scholarships are often offered to students based on merit, extracurricular achievement, financial need or certain personal characteristics. Just being an international student makes you stand out, so if you look hard and remain flexible, there's probably a scholarship for you.

Internationalise your CV

Employers are increasingly looking for graduates with international experience and broad skill sets.

International students in the US also have the opportunity to gain experience in industry during their studies through work experience and internships and can work in the US for up to one year after graduation from an American university on the Optional Practical Training (OPT) scheme; graduates in STEM subjects can stay on for up to three years.

US institutions offering undergraduate degrees

Application timeline

Ideally, the application process will begin 1-1½ years before enrolment at a US university. For most students, this is during the spring/summer at the end of Year 12 (or equivalent).

Spring/early summer at the end of Year 12:

- Begin by reading the comprehensive US admissions information provided in the 'Going to the USA' section of the Fulbright website: www.fulbright.org.uk and begin thinking about your choosing factors.
- Research universities that meet your criteria and begin selecting the universities to which you will apply.
- Make a schedule of application deadlines and requirements.
- Based on the universities you are interested in, decide whether you need to take an admissions exam (the ACT or SAT) and register early. See page 14 for more info on admissions tests.
- Begin drafting your university and funding applications.
- Most university applications open online on 1 August, including the Common Application (used by over 900 US universities).

Autumn/early winter of Year 13:

- If you need to submit standardised test scores for your applications and have not already taken the test, you should register for and sit it at this point. The tests are offered on specific dates, generally from October through June. Depending on the test, it can take a few weeks for your scores to be ready. Keep in mind, most universities would like to receive these scores in time for their application deadlines and you will want to see them before they go to the universities, so you can act accordingly.
- Narrow your choices to the final list of universities to which you will apply. We recommend applying to 6-10 well-chosen universities (see page 8 for factors to consider when choosing a university).
- Write and edit your admissions essays.
- Request a transcript from your school and choose referees for 2-3 letters of recommendation.
- Alongside (or as part of) your admissions applications, apply for funding from US universities and external funding bodies – see page 10 for more information on funding US study.
- **Submit your applications.** Early Decision (legally binding) and Early Action deadlines are generally in early November, while Regular admissions deadlines tend to be in January.

Spring/summer of Year 13:

- Receive regular admissions decisions by email or post between March and April.
- Notify the universities of your decision by 1 May, pay a non-refundable deposit and apply for your visa.
- August/early September: orientation and enrolment – begin study in the US!

Some People Ask
What's Next.
Others Create It.

At Embry-Riddle Aeronautical University, you'll do more than earn a degree – you'll prepare to lead in industries that shape the future.

As the world's leading aviation and aerospace university, Embry-Riddle offers programs in aviation, business, technology, engineering, security, intelligence and space. Through hands-on learning and expert faculty, you'll graduate ready to make an impact.

Whether your goal is designing aircraft, exploring space, protecting critical systems or leading innovative organizations, Embry-Riddle can help you get there.

Choosing a university

With thousands of academic programmes, world-class institutions and unrivalled flexibility, the USA offers a breadth of higher education opportunities you won't find anywhere else in the world.

Narrowing these institutions down can be an exciting and surprising process, and many students find their perfect match at a university or location they had not previously thought or maybe even heard of. To help you narrow down the many options of universities in the US, we have created three steps to find your fit. Follow our three-step process for choosing the best university for you!

Step 1: Think before you search

Speak to those closest to you and prioritise the more important factors for your US university experience. The list below is not exhaustive, but lays out some things you might consider:

- Type of degree and university, class size
- Funding opportunities, cost of living
- Academics (whether you're on par with their average admitted student, majors on offer, style of teaching etc)
- Personal fit (campus life, size, setting, clubs, internship opportunities etc)

Step 2: Do your research

Once you know what is important to you, it's time to do some research and put together a list of 10-20 universities that meet all or most of your criteria.

Please see our website for several links with resources that can help aid your research process, including our own USA College Day university page and other university search engines and review guides.

Some of these resources include university rankings, but rankings in the USA are not the same as in the UK. Some do not rate the quality of teaching or graduate prospects, and some give weight to how much money a university has, or even invite universities to peer rank themselves! We therefore advise that you take rankings with a grain of salt.

While rankings can be a useful tool, they *should not* be the only method you use to choose a university. We encourage you to use the search functions listed on our website to look for universities that meet the factors that are important to you.

Step 3: Narrow your choices

Once you have 10-20 universities that meet your criteria, you should narrow this list down to the ones to which you will apply to and which will be the best fit for you. Think strategically to increase your chances of admission.

We recommend you apply to 6-10 US universities to maximise your competitiveness, with a range of institutions including:

- 2-3 "reach schools" – schools where admission would be tough based on your academic profile
- 2-4 "match schools" – schools that match your academic profile
- 2-3 "likely admittance schools" – schools where your academic profile is safely higher than their average (think 'insurance' choice)

If you require university funding, consider applying to more 'insurance' choice and match schools than reach institutions. Wherever your academic profile is higher than the university's average, the more likely it is that you will be a competitive applicant and stand a greater chance of gaining merit-based scholarships if there are any available.

Campus visits

You do not need to visit a US university before you apply. However, if you have the resources and time to do so, campuses are usually open for self-guided tours throughout the year, except federal holidays and winter closures. You should contact each university to find out their specific arrangements, and when guided tours are available.

If you cannot visit a university, consider the following:

- Meet the university at USA College Day
- Check if virtual tours are available
- Ask the admissions office to put you in touch with a British student or alumnus
- Follow the university on social media

Funding US study

There are lots of opportunities to fund your undergraduate studies in the USA, but strategy and organisation are key.

What to know:

- Universities with higher “sticker prices” can sometimes also be the ones with large endowments to fund the most competitive applicants
- It pays to be flexible and open-minded
- You can’t take your UK student loan with you
- Not all US universities offer financial aid to international students

Steps for funding US study:

1. Visit the Undergraduate Study – Funding section of the Fulbright website (www.fulbright.org.uk) for information about funding US study. Funding options include: Personal/family savings, scholarships from US universities, scholarships from external funding bodies and loans from a US or UK lender.

2. Assess your personal/family savings to determine your financial need.

3. Investigate university funding. Applying for funding often happens simultaneous to (or is integrated into) the admissions process. US universities may award funding on the basis of financial need (sometimes referred to as grants) and/or merit (scholarships), as well as sports scholarships.

4. Choose your US universities carefully, as not all will offer funding to international students. Some may have significant financial aid, scholarships or be located in areas with lower living costs (see page 8 for more tips on choosing a university).

5. Explore external scholarships. Many scholarships from external funding bodies are awarded based on specific personal qualities outlined by the funding body. Enjoy doing volunteer work on the weekend, have a unique background or participate in community theatre? There may well be an organisation or university that is willing

to reward you for who you are and what you like to do. Scholarships from external funding bodies may also be awarded on the basis of merit.

6. Loans. The availability of US-based loans for non-US citizens is limited. In almost all cases, US-based loan programmes require non-US citizens to have a creditworthy US citizen or permanent resident to act as a co-signer. However, UK citizens may apply for a personal loan from a UK bank and apply it toward US study. US citizens can apply for US government loans via the FAFSA website and may be eligible for loans from a private US-based lender.

Funding tips:

- Be strategic in choosing where to apply and during which admissions round.
- Start your scholarship search early and be willing to put in extra time and effort to seek out and apply for scholarships.
- Apply to multiple sources of funding (including university and external funding bodies).
- Keep in mind that if you are not a US citizen, you will need to demonstrate access to sufficient funding for the first year of study in order to apply for a visa.

Suggested funding resources:

US universities’ websites, the Fulbright website and mailing list and online scholarship searches, including:

- Big Future College Search (when completing the college search, tick the box to show only results that offer financial aid to international students).
- www.fundingusstudy.org
- www.internationalscholarships.com
- www.iefaf.org
- www.edupass.org/finaid
- www.educationusa.state.gov

The application process

We recommend that you begin this process early! You should plan adequately for the time and effort involved. We also advise you to stay organised and note deadlines to track what you need to do and when.

Start early, plan ahead, and know the application requirements.

Be aware that applications require a great deal of preparation and planning. In the US, application requirements can vary greatly from one institution to another, so you will need to check the website of each institution's international admissions office. Undergraduate applications are typically due between November and January to enrol the following autumn.

Things to know:

- Unlike UCAS, you apply to each US university separately
- Over 900 US institutions use the Common Application, an online portal to help you manage each application – we have a page dedicated to this on our website with a student and school guide, as well as video tutorials
- Universities will set their own application deadlines, fees and requirements
- You apply to the university, college or school as an undergraduate student, not to a specific degree programme or department
- Offers of admission are not conditional/unconditional in the way that most UK offers are – if they admit you, they expect you to continue working towards your predicted grades, but won't specify required grades and are unlikely to rescind your offer unless your final results are significantly lower than your predictions

Since US university applications are slightly longer than in the UK, you have a greater opportunity to demonstrate why you are a suitable applicant. The US admissions process is holistic and your application is taken in context.

If you've done your research and have chosen suitable universities, you stand every chance of being an

attractive applicant to the admissions committee. More British students study in the USA than anywhere else in the world: we want to study there, and they want us on their campuses. The following components typically make up a university application:

- 1. Application form:** which asks for basic information such as contact details, schools attended, marks achieved, work experience, community/school-related activities, etc.
- 2. Transcript and school report:** a transcript is a listing of your academic qualifications and marks covering your final four years at secondary school/sixth form. It may include GCSE marks, predicted A-levels (or equivalent), academic honours, information about your school, etc. Your school/counsellor may need to create a transcript – we have a template and further guidance on transcripts available on our website. The school report provides the admissions committee with information about the context in which you have studied.
- 3. Admissions test scores:** admissions test scores (either the ACT or SAT) will be sent to universities that require them by the organisation that administered the test.

4. Essays: strong essays can set you apart from other applicants and give you an opportunity to showcase what you as an individual can bring to a university. Rather than submitting an explanation of your interests and achievements in a specific field of study as you would in your UCAS personal statement, you will be asked to respond to between one and three essay questions on your US university application. Each university will set its own questions, as well as desired length for your response (often 250-650 words).

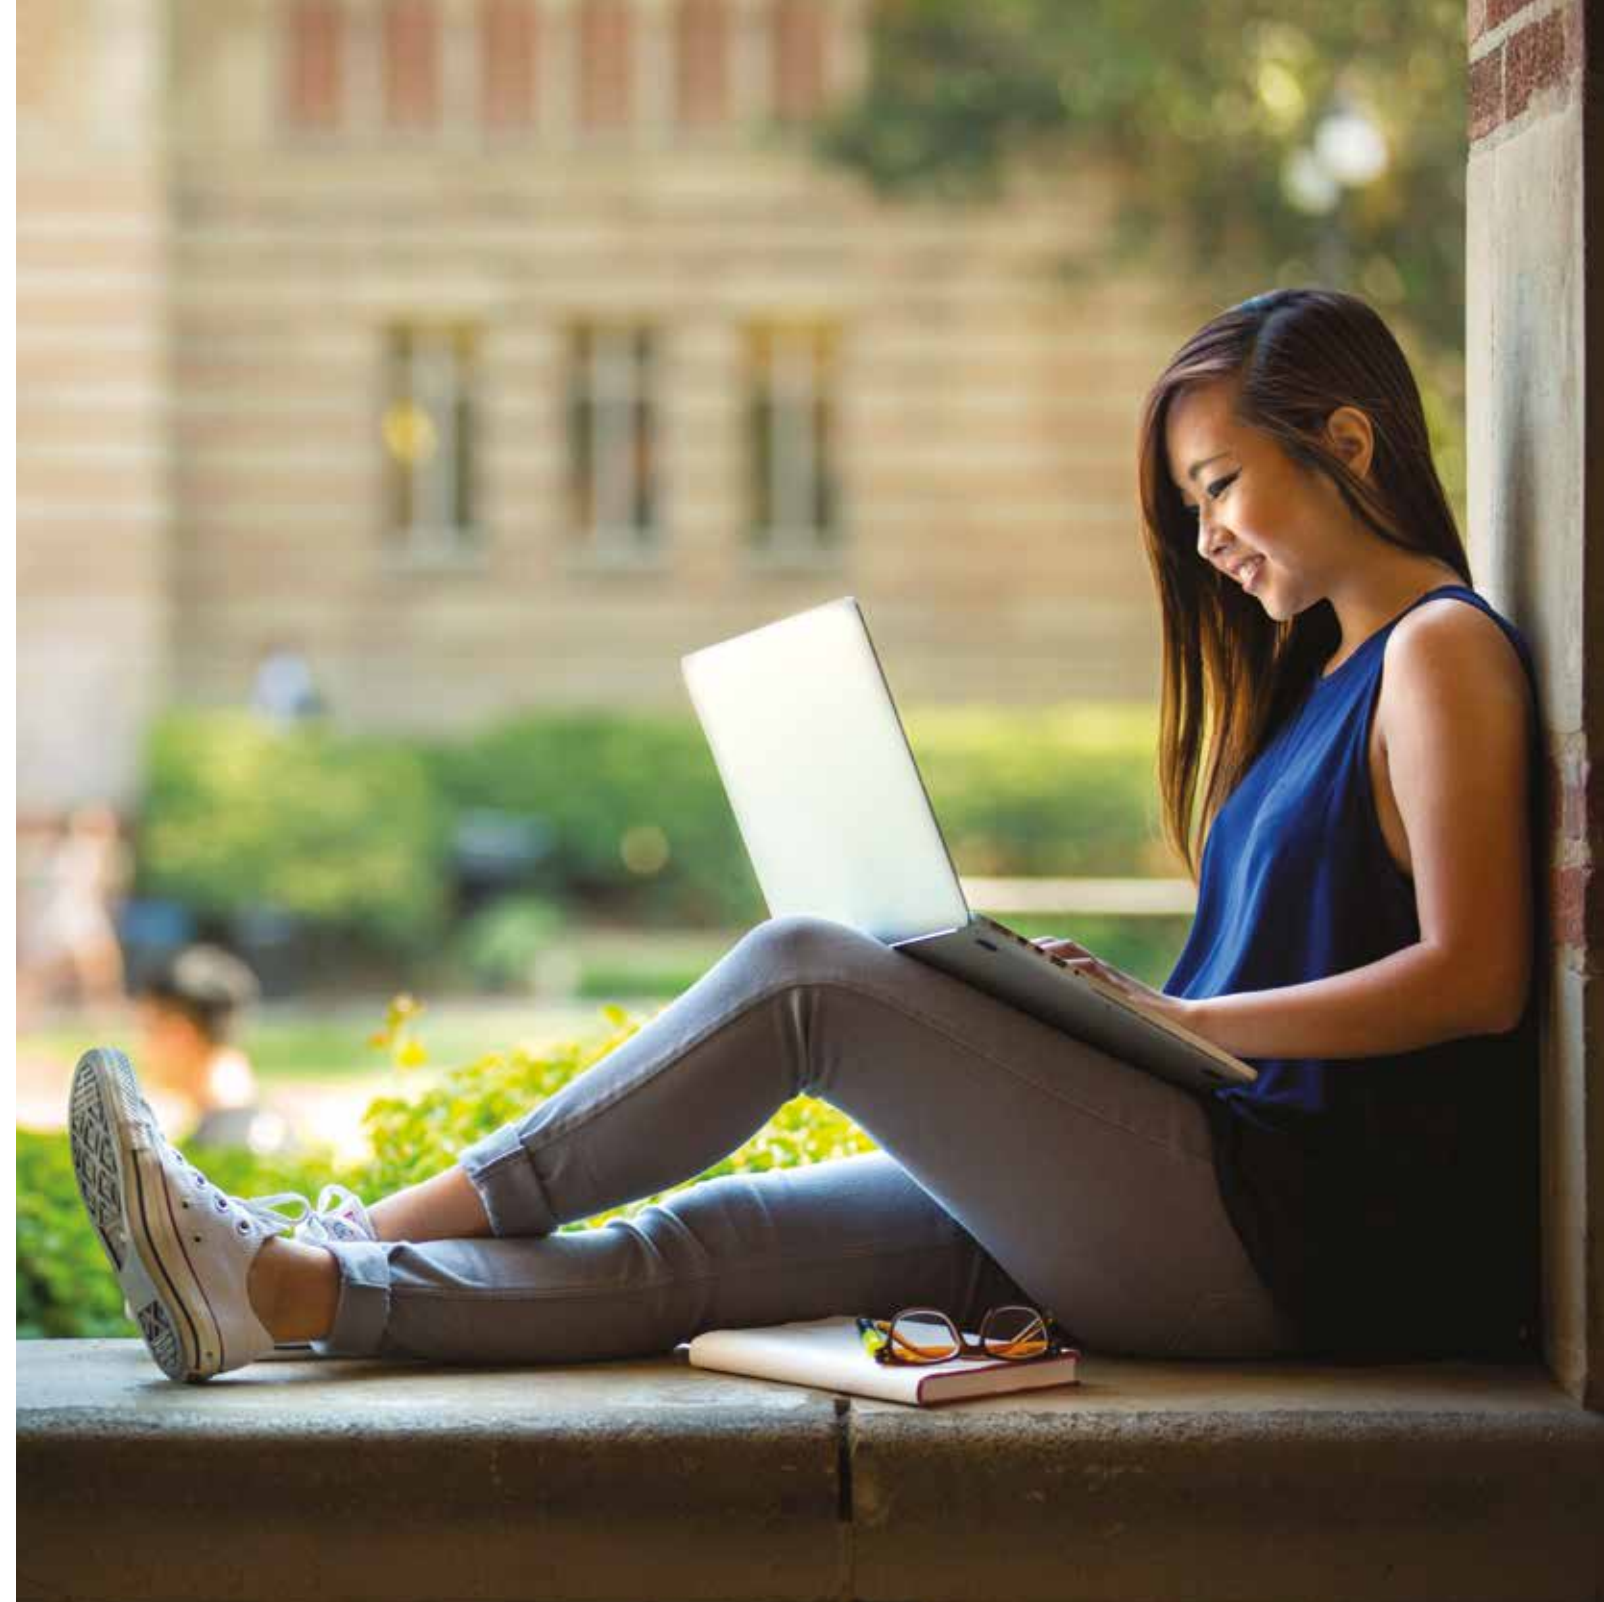

5. Recommendation letters: you will likely be required to gather 2-3 letters of recommendation from people who know you well in and out of the classroom. The

university may provide guidelines for selecting referees, such as requiring one letter from a teacher or school official. You will be responsible for liaising with your referee and should use recommendation letters as a marketing tool for you as an applicant. We have further guidance on this component of your application in the university guide on our website.

6. Application fee: you should also be aware that there may be a fee involved for each university application you submit, which is set by each institution. This is another reason we advise you to narrow down your

options to 6-10 universities! You should anticipate approximately \$50-100 per application, though fee waivers may be available in some cases.

We have a detailed guide to US undergraduate applications available on our website at www.fulbright.org.uk, where you can find substantial information to learn about the different application components. We go into each requirement in detail, discuss how admissions decisions are made, and give guidance on what you should be doing during the year to apply effectively.

Admissions tests: ACT & SAT

Admissions exams are a way for some universities to compare applicants who might come from different backgrounds and educational systems across the USA and the world.

Results are used to support part of a university's admissions and merit-based scholarship decisions.

They can assess, among other things:

- Verbal reasoning and language analysis
- Critical reading
- Writing
- Mathematics and data analysis

Are they required?

Universities can set their own admission requirements. Many will require the submission of admissions exam scores. However, an increasing number of universities are becoming *test optional*. This means they will not hold it against applicants who do not submit scores. In lieu of a test score, a test optional institution might require you to submit a graded piece of coursework or controlled assessment. A full list of test optional institutions can be found on www.fairtest.org, but double-check with the institutions where you're applying to see if you need to take a test.

Which exam to take?

There are two undergraduate admissions exam formats accepted by US universities:

- ACT administered by ACT, Inc
- SAT administered by The College Board

There are online resources comparing the two tests side by side, and we have linked the *Princeton Review* table on our website as a tool to help determine which test is the best for you.

Universities do not prefer one test over the other, so which one you take is down to your personal preference. You can take free sample tests on each exam's website and should play to your strengths.

Prepare properly for whichever exam you decide to take. There are many free resources available online, including practice-tests and resources provided by both ACT, Inc. and The College Board for their respective exams.

Test centre locations

Location and availability might determine which test you take as the SAT and ACT offer tests at varying points in the year as well as different test-taking centres. We have links on our website with the details related to testing centre locations and times.

AMERICAN UNIVERSITY

Washington, D.C. | www.american.edu

American University is a student-centered research institution located in Washington, DC, with highly-ranked schools and colleges, internationally-renowned faculty, and a reputation for creating meaningful change in the world. Our students distinguish themselves for their service, leadership, and ability to rethink global and domestic challenges and opportunities.

AMHERST COLLEGE

Amherst, Massachusetts | www.amherst.edu/admission/apply/international

Located in scenic western Massachusetts, Amherst College is considered one of the premier liberal arts colleges in the nation, enrolling about 1,900 bright, talented, energetic and curious young people. A commitment to diversity, defined in its broadest sense, is fundamental to Amherst's mission. Need-blind admission for all applicants (domestic and international) and generous, no-loan financial aid offers ensure that exceptional students from across the country and around the world are admitted to Amherst based on accomplishment and promise, regardless of family income.

ARIZONA STATE UNIVERSITY

Phoenix, Arizona | www.asu.edu

Arizona State University is a global leader in higher education, ranked #1 in the U.S. for innovation for 11 consecutive years and #2 among public universities for employability. Across four campuses in the Phoenix metropolitan area, students from 150+ countries choose from more than 400 degree programs while enjoying Arizona's year-round sunshine, striking desert landscape and the warmth of a welcoming local community. Comprehensive arrival, visa, academic and career support ensures international students have the resources to succeed from day one.

BABSON COLLEGE

Wellesley, Massachusetts | www.babson.edu

Located just 16 kilometers outside of Boston, Babson College is a top-ranked business school and the No. 1 school for Entrepreneurship 29 years and counting

by U.S. News & World Report. In 2026, Babson was ranked #2 College in America by The Wall Street Journal. These honors showcase the impact of our hands-on curriculum, dynamic faculty, and unmatched career resources. Our Wellesley, MA campus is home to approximately 3,000 undergraduate students from nearly all 50 U.S. states and over 90 countries worldwide. Students earn a Business degree, while getting to choose from 27 concentrations and everyone starts a business in their first year.

BARD COLLEGE

Annandale on Hudson, New York | www.bard.edu

Bard College is located an hour and a half north of New York City on a 1000-acre campus overlooking the Hudson River and the Catskill Mountains. Bard seeks to inspire curiosity, a love of learning, idealism, and a commitment to the link between higher education and civic participation. Providing a liberal arts and sciences education, the Annandale-on-Hudson campus hosts 1900 undergraduate students but Bard works with 6000 students worldwide through our local, national and international programs, partnerships, and campuses in the Bard Network.

BARNARD COLLEGE

New York, New York | www.barnard.edu/admissions-aid

Since 1889, Barnard College has led higher education as a rigorous liberal arts and sciences college for women. Located in New York City and partnered with Columbia University, Barnard offers a unique environment where a tight-knit community meets big-city momentum. Our world class faculty educates over 3,000 students fostering collaboration across the humanities, social sciences, and natural sciences. At Barnard, leadership and innovation are part of everyday life. By meeting full financial need for all, Barnard empowers bold women with the tools to lead and to make their mark in the world.

BATES COLLEGE

Lewiston, Maine | www.bates.edu

Aligning who you are with what you do is the heart of the Bates experience. We believe the best way to approach college is to find what makes you tick, and then build the coming years around it. A small liberal

arts college located in Maine, Bates is known for its over three dozen majors with a focus on rigorous and interdisciplinary scholarship, 100 clubs and organizations, nationally recognized centers for career development and community engaged work, focus on sustainability, and deep commitment to living up to our mission of inclusion and social responsibility.

BENTLEY UNIVERSITY

Waltham, Massachusetts | www.bentley.edu

Bentley University, located just minutes from Boston, cultivates the next generation of business leaders at the intersection of innovation, analytics, and global ethics. As one of the nation's top business schools, Bentley prepares students to be a force for positive change in communities, organizations, and the world. Students expand their networks through internships at top firms, global study opportunities, and student-run enterprises. Consistently ranked among the top five schools for career services by The Princeton Review, more than 98% of graduates are employed or enrolled in graduate school with a median starting salary of \$75,000.

BOSTON COLLEGE

Chestnut Hill, Massachusetts | www.bc.edu

Boston College is a private Jesuit research university in Chestnut Hill, MA, enrolling about 9,654 undergraduates with a 10:1 student-faculty ratio. Founded in 1863, it's known for strong undergraduate teaching, Division I athletics, and a strong liberal arts foundation. BC receives around 42,000 applications with a 12% acceptance rate and offers 300+ student organizations. There is a train station across from campus and students can easily take advantage of all that the city of Boston has to offer. Campus is approximately 10km from Logan International Airport.

BOSTON UNIVERSITY

Boston, Massachusetts | www.bu.edu/admissions/

In the heart of Boston, recognized as the education capital of the world, Boston University serves as a standard for research, academic excellence, and dauntless passion to pursue knowledge without limits. With guidance from academic scholars and faculty at 10 schools and colleges, students can choose from more than 300 programs to create their own journey and path to success. A 10:1 student-to-faculty ratio, and average class size of 30 means that professors know their students by name. With a residential campus,

world-class research, and a vibrant global outlook, BU offers every student the place to find their community.

BOWDOIN COLLEGE

Brunswick, Maine | www.bowdoin.edu

Bowdoin College pairs a rigorous liberal-arts education with a commitment to access and opportunity. We seek curious, collaborative students who take intellectual risks and act with integrity. Our coastal Maine campus supports hands-on research and a tight-knit community. Need-blind admission means family finances won't determine enrollment. Test-optional since 1969, we review applicants holistically. Through our Digital Excellence Commitment every student receives the hardware and tools to learn, create, and lead in a digital world.

BRANDEIS UNIVERSITY

Waltham, Massachusetts | www.brandeis.edu

Brandeis University is a small private R1 research university located in the Boston area with global reach and outstanding graduate outcomes. We are dedicated to first-rate education while making groundbreaking discoveries. Our faculty are leaders in their fields, as passionate about teaching and mentorship as they are about pushing the boundaries of knowledge.

Brandeis was founded in 1948 by the American Jewish community at a time when many ethnic and racial minorities, and women, faced discrimination in higher education access. Brandeis continues to be dedicated to the idea that we should use our talents and knowledge to repair the world.

BRYANT UNIVERSITY

Smithfield, Rhode Island | www.bryant.edu

Bryant University, located in Smithfield, Rhode Island, is a top-ranked private Division I university, recognized by U.S. News & World Report among the Top Regional Universities in the North. Bryant integrates business, liberal arts, and health sciences to prepare students for success in a global economy. Ranked in the top 1% for return on investment, Bryant delivers exceptional outcomes, with 99% of graduates employed or in graduate school within six months.

BRYN MAWR COLLEGE

Bryn Mawr, Pennsylvania | www.brynmawr.edu

Bryn Mawr is a liberal arts and sciences college for

women just outside the city of Philadelphia. The campus is home to almost 1300 undergraduates and approximately 13% of the students are international. The academic offerings at Bryn Mawr are diverse including majors such as psychology, English, math, neuroscience, international studies and more. The faculty and staff actively mentor students in a dynamic and connected community with unique traditions. Students also have expansive educational and social opportunities through long-standing partnerships with nearby Haverford College, Swarthmore College, and the University of Pennsylvania.

CALIFORNIA LUTHERAN UNIVERSITY

Thousand Oaks, California | www.callutheran.edu/admission/international

California Lutheran University (CLU) is a private university in Southern California offering bachelor's, master's, and doctoral degree programs. Located in Thousand Oaks, just one hour north of Los Angeles, CLU is situated in one of the safest cities in America. With more than 3,000 students, we provide a personalized learning environment and strong academic programs in the business, education, psychology, and technology. Highlights 1. Merit scholarships and need-based grants are available for undergraduate international students. 2. Test-optional (ACT/SAT not required). 3. Guaranteed on-campus housing for undergraduate students.

CENTRAL CONNECTICUT STATE UNIVERSITY

New Britain, Connecticut | www.ccsu.edu

Central's beautiful campus in New Britain, CT, lies just 15 minutes from the capital city of Hartford and about two hours from New York City and Boston. Central offers a welcoming environment with state-of-the-art technology, places to study, relax, and enjoy friends. Students enjoy 9 residence halls, 140 clubs, Division I athletics, and extensive support services. More than 100 academic programs span three schools—Business; Engineering, Science & Technology; and Education—and two colleges—Health & Rehabilitation Sciences and Liberal Arts & Social Sciences. We are exploring the opportunity to further define Central through a polytechnic model — one that intentionally integrates applied learning, research, innovation, and our strong liberal arts and social sciences foundation. Central awards baccalaureate, graduate, and doctoral degrees.

CLARK UNIVERSITY

Worcester, Massachusetts | www.clarku.edu

Clark University was founded in 1887 as one of the first all-graduate institutions in the country. Today, Clark promotes a rigorous liberal arts curriculum within the context of a research experience that addresses challenges on a global scale. We're privately funded, coeducational, and nonsectarian, offering bachelor's, master's, certificate, and doctoral degree programs in a wide range of disciplines.

COASTAL CAROLINA UNIVERSITY

Conway, South Carolina | coastal.edu

Coastal Carolina University is a dynamic, public institution located in South Carolina, USA near the beach resort area of Myrtle Beach. On its picturesque campus, approximately 11,000 students from 60 countries around the world interact with world-class faculty while benefiting from experiential learning opportunities through internships, research projects and career development counseling. The university offers comprehensive degrees in over 100 undergraduate programs and over 30 graduate programs, including a top-ranked Ph.D. in Marine Science Systems, and a Ph.D. in Education.

COLGATE UNIVERSITY

Hamilton, New York | www.colgate.edu

Founded in 1819, Colgate is a distinctive, leading American university known for its intellectual rigor, world-class professors, campus of stunning beauty, and loyal alumni. Through its curriculum, the engagement of the faculty, and life on the campus, Colgate challenges students to be enlightened thinkers and prepares them to be global citizens who will thrive in life and in work. At the core of Colgate University is one of the most ambitious and relevant learning experiences in the country. Offering over 57 areas of study, 250+ clubs and organizations, and NCAA Division I athletics, Colgate students are, at their core, ambitious.

COLLEGE OF THE CANYONS

Santa Clarita, California | www.canyons.edu

College of the Canyons (COC) is located in beautiful, sunny Southern California, where our students thrive in a safe learning environment that values diversity and innovation. COC is a community college recognized locally, statewide, and internationally for our comprehensive student support systems, award-winning

academic and professional programs, and excellence in teaching and learning. We specialize in affordable 2+2 pathway programs, transferring students to complete their bachelor's degrees at top-notch universities after two years with us. The tuition and fees are around \$15,000 a year.

COLORADO COLLEGE

[Colorado Springs, Colorado | www.coloradocollege.edu](http://www.coloradocollege.edu)
Colorado College is a distinctive college located in Colorado Springs, Colorado. Our mission is to provide the finest liberal arts education in the country. For almost 150 years, CC has provided a robust learning and living experience, 50 years delivering it with our intensive Block Plan where you take only one class at a time. With a campus at the foot of the majestic Rockies, professors that ignite your curiosity, and intelligent peers who challenge and support you, CC is a place you can call home.

COLUMBIA UNIVERSITY

[New York City, New York | www.undergrad.admissions.columbia.edu](http://www.undergrad.admissions.columbia.edu)
Located in the world's most international city, Columbia University offers to a diverse student body an exceptional foundation in the liberal arts, sciences, and engineering. Joint degree programs also take full advantage of the University's other divisions on the undergraduate and graduate level. The pace and excitement of New York influence many aspects of life on campus, but students nonetheless enjoy a residential collegiate atmosphere on the 36-acre campus. Housing is guaranteed for four years of undergraduate study.

CONNECTICUT COLLEGE

[New London, Connecticut | www.conncoll.edu](http://www.conncoll.edu)
Founded in 1911, Connecticut College is a private liberal arts college in New London, Connecticut. Our Connections curriculum empowers students to explore meaningful questions by integrating multiple disciplines, pursuing internships, conducting research, and studying off campus. This hands-on approach bridges academic learning with real-world problem solving, community engagement, and global perspectives. Graduates develop the creativity, adaptability, and critical thinking needed to thrive across diverse careers and make a lasting impact.

DAVIDSON COLLEGE

[Davidson, North Carolina | www.davidson.edu](http://www.davidson.edu)

With over 100 majors to choose from, students gravitate toward sustainability, health and wellness, animal sciences, the liberal arts and beyond. UVM professors are acclaimed researchers, scholars, and artists who bring their discoveries into the classroom. Students' lives are enriched by the stunning location, acclaimed for business innovation, recreation, and safety.

UNIVERSITY OF WISCONSIN-MADISON

Madison, Wisconsin | www.wisc.edu

Since its founding in 1848, this campus has been a catalyst for the extraordinary. As a public land-grant university and major research institution, our students, staff, and faculty engage in a world-class education while solving real-world problems. With public service — or as we call it, the Wisconsin Idea — as our guiding principle, Badgers are creating a better future for everyone.

VASSAR COLLEGE

Poughkeepsie, New York | www.vassar.edu

Vassar is an independent, coeducational, residential liberal arts college, which fosters intellectual openness and lively exploration through its widely varied course offerings. Founded in 1861 to offer women a fully equivalent education to that of the best men's colleges of the period, Vassar became the first women's college in the nation to expand its mission to coeducation by opening its doors to men in 1969. Students are encouraged to develop diverse perspectives through engaging in lively dialogues with faculty and fellow students, which enables them to achieve the insight and confidence to function most creatively in our complex world.

VILLANOVA UNIVERSITY

Villanova, Pennsylvania | www.villanova.edu/university

Rooted in the values of truth, unity, and love, Villanova brings together driven, determined students who use their learning to better the world around them. Founded in 1842, Villanova is the nation's only Augustinian Catholic university, known for a personalized experience where faculty and students are partners in learning. A top-ranked national university, we offer more than 100 majors and minors across the liberal arts, sciences, business, engineering, and nursing to 7,000+ undergraduates from around the world. Our suburban campus sits just outside Philadelphia, between New York City and Washington, D.C. With 300+ student organizations, Division I athletics, and a deep commitment to service, Villanova shapes world changers grounded in purpose and community.

VIRGINIA TECH

Blacksburg, Virginia | www.vt.edu

Virginia Tech (Virginia Polytechnic Institute and State University) is a public land-grant research university that combines a high-ranking academic environment with a deep-rooted sense of community and service. Nearly 38,000 undergraduate students are studying in over 120 different majors that span a wide range of academic disciplines. Located in the Blue Ridge Mountains of Southwest Virginia, Blacksburg is a quintessential college town known for its welcoming community, natural beauty, and outdoor recreation.

WAKE FOREST UNIVERSITY

Winston Salem, North Carolina | www.wfu.edu

Wake Forest is a collegiate university that balances the personal attention of a liberal arts college with the academic vitality and broad opportunities of a research university. At the heart of Wake Forest is the teacher-scholar ideal. In small classrooms and cutting-edge research labs, professors practice their art with keen interest in students and their lives. Our model and curriculum educate the whole person and often help students discover interests they had never previously discovered. Over the past seven years, 82% of graduates have declared a second major and/or a minor or minors.

WASHINGTON UNIVERSITY IN ST. LOUIS

St. Louis, Missouri | www.admissions.washu.edu

WashU is one the USA's premier higher education institutions. Our medium-sized student body (about 7500 undergraduates) can complete degrees in Arts & Sciences, Engineering, Business, or Art & Architecture. Many students pursue interdisciplinary interests across multiple schools and majors and our award-winning faculty are active researchers who encourage students to engage in research themselves. Our student body is extremely active and our residential living has been consistently ranked as among the best in the US. Finally, students are able to explore St. Louis, a wonderful city with great

WELLESLEY COLLEGE

Wellesley, Massachusetts | www.wellesley.edu/admission-aid

Wellesley College is a prestigious private liberal arts college for women in Wellesley, Massachusetts. Founded in 1870, it is known for academic excellence, a strong tradition of women's leadership, and a vibrant, intellectually engaged community. The college offers a broad liberal arts education across the humanities, social sciences, natural sciences, and interdisciplinary fields, with a focus on close faculty-student collaboration and empowering students to make meaningful contributions in their communities and beyond.

WESLEYAN UNIVERSITY

Middletown, Connecticut | www.wesleyan.edu

Wesleyan University, Ideally situated on a hill overlooking the Connecticut River in Middletown, CT, is dedicated to providing an education in the liberal arts that is characterized by boldness, rigor, and practical idealism. Wesleyan's open curriculum champions the belief that student choice fosters the drive to explore freely and seek connections across courses, generating the intellectual excitement that can fuel liberal education as a lifelong pursuit. Here, distinguished faculty scholars collaborate closely with students, embracing the fluidity among disciplines to explore the world through diverse perspectives and methodologies.

WILLIAM & MARY

Williamsburg, Virginia | www.wm.edu

Located in Williamsburg, Virginia, not far from Washington D.C., William & Mary brings together the global opportunities of a public research university with

the personal education of a liberal arts and sciences institution. Choose from 115+ majors, minors and pre-professional programs — anything from business analytics to integrative conservation to a major you design yourself. W&M students think critically and express themselves creatively. Here, you'll learn to question and to innovate. From our state-of-the-art science labs to the new, expansive Arts Quarter, W&M's well-earned reputation delivers a world-class education.

WILLIAMS COLLEGE

Williamstown, Massachusetts | www.williams.edu

Williams believes in undergraduates. Students, scientists, artists, and scholars come here from around the world and make Williams a cosmopolitan epicenter, a creative incubator, a global stage, and a launch pad for impact that reaches far beyond campus. Williams recently launched the nation's first all-grant financial aid program, making it one of the most generous programs in the country. It's the breadth and depth of students' experiences—intellectual and experiential, theoretical and practical, local and global—that position graduates to thrive and lead in fields as diverse and evolving as they are themselves.
